

Small Scale Renewables Accredited Installers - Scotland

Accredited Installer List

(updated 12/06/2009)

To apply for grant funding you must use products and installers accredited through the **Microgeneration Certification Scheme (MCS)**, the full listing of these installers and products is managed by Gemserve Limited.

To assist grant applicants there is a list of those accredited installers who are based in or operate in **Scotland**. This list is found below. Your installer should know which products are accredited.

The list is not exhaustive and is updated frequently.

The full installer and product lists for the whole of the UK can be obtained at www.microgenerationcertification.org within the Information for Home and Business Owners section.

Heat pump accreditation – The Microgeneration Certification Scheme now accredits air, water and ground source heat pumps, however its predecessor accredited only ground source, whilst the Energy Saving Trust accredited air source separately. For a transition period there are therefore some installers accredited for all types of heat pumps, and others who are accredited only for ground or air. The heat pump section below is therefore in three parts.

Air source heat pump and solar air products - In addition to the MCS list, air source heat pump and solar air *products* accredited by the Energy Saving Trust which are not found on the MCS list can be found here: http://www.energysavingtrust.org.uk/Global-Data/Publications/G_21-10-08_List-of-Approved-Products

Air source heat pump installers – EST independently accredited some air source heat pump installers. These are included in the list below.

If you need any further help please contact your local Energy Saving Scotland advice centre on 0800 512 012.
